

COMPASS PROGRAM

at

RCBM

Comprehensive Psychological Assessment and Screening Services

General Diagnostic Screening

Assesses for symptoms of up to 60 psychiatric conditions

Clarifies diagnosis to inform treatment plan

Conducted by psychometric team under psychologist supervision

Primarily completed independently online; may include a proctored component

Specialized Psychological Evaluation

Evaluates for specific concerns including learning disorders, cognitive decline, and Autism Spectrum Disorder

Often used to establish a diagnosis for supports, accommodations and services

Conducted by RCBM psychologists

Completed in clinic

Note: Most Specialized Psychological Evaluations start with General Diagnostic Screening to establish clinical context and rule out psychiatric comorbidities
